# PIPING UT DEMONSTRATION
# NODE 1 TO NODE 2 CONTROLLED TRANSITION

CONTROLLED ENGINEERING DRAWING
AI-ENABLED ENGINEERING PROCESS DATA FLOW

## PROCESS AND TEST POINT EVIDENCE

**See Sheet 2 to check evidence and requirements**

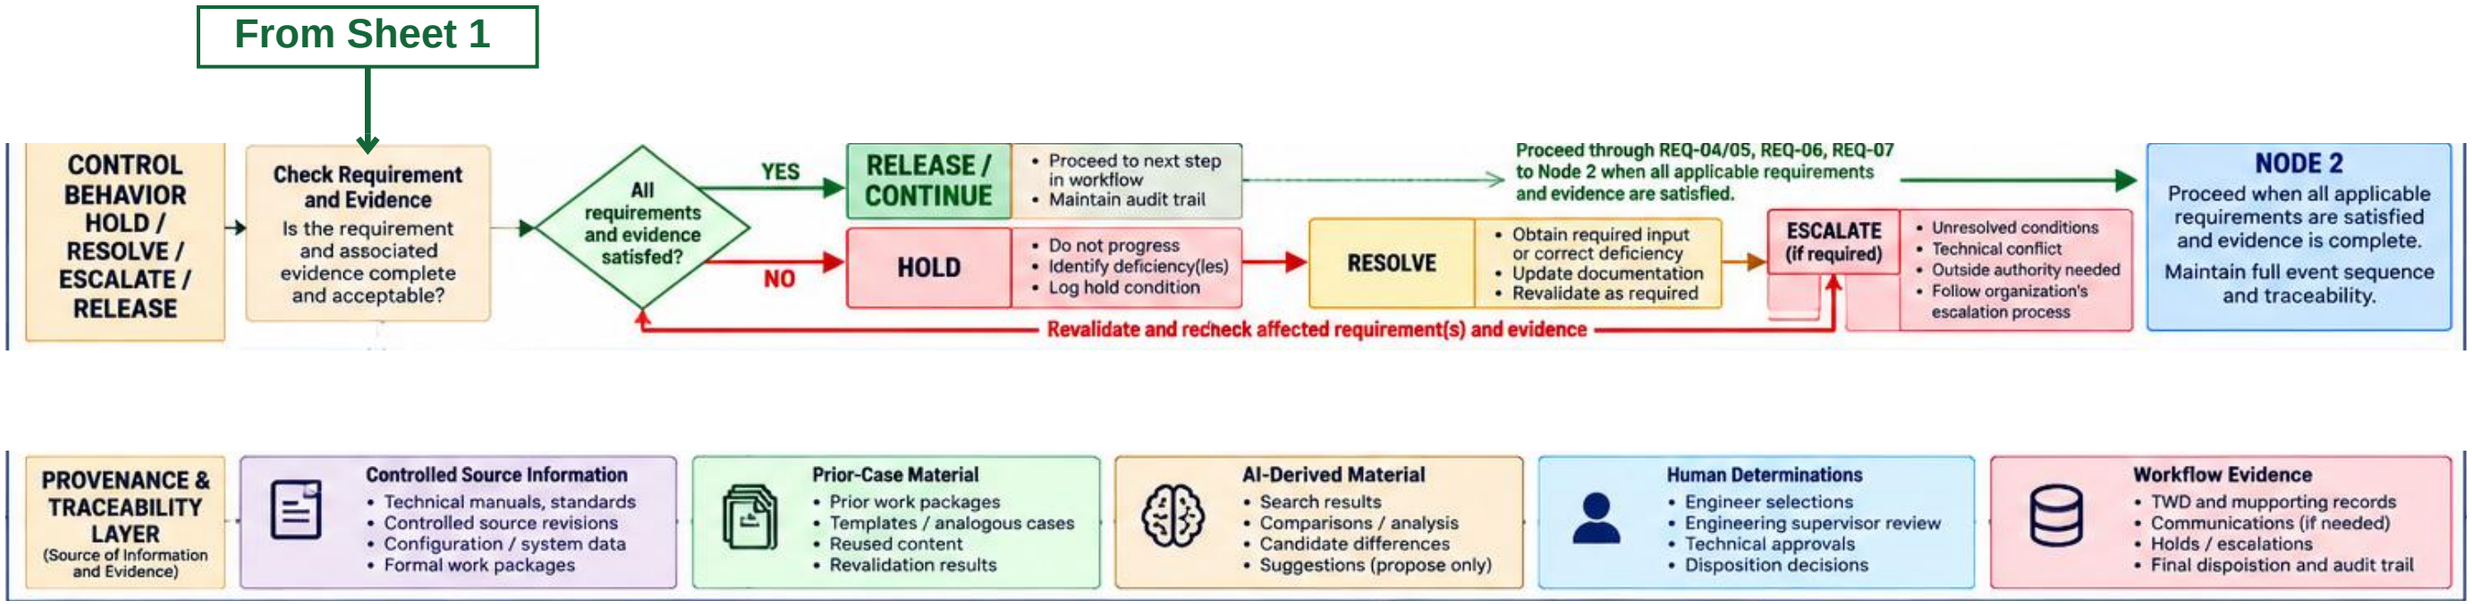

Control behavior, provenance and drawing notes: see Sheet 2.

Progression remains subject to all applicable requirements and evidence being satisfied.

## CONTROL BEHAVIOR AND PROVENANCE

**NOTES:**

1. THIS DRAWING REPRESENTS THE CONTROLLED NODE 1 → NODE 2 TRANSITION FOR THE PIPING UT DEMONSTRATION PROJECT.
2. **AI OUTPUT IS ADVISORY.** AI MAY SUPPORT RESEARCH, SOURCE COMPARISON, DIFFERENCE IDENTIFICATION, ANALYSIS, ORGANIZATION, AND EVIDENCE PREPARATION. AI DOES NOT ESTABLISH TECHNICAL AUTHORITY OR APPROVE PROGRESSION.
3. **TECHNICAL REQUIREMENTS ARE HUMAN-DETERMINED.** THE **ENGINEER** DETERMINES THE APPLICABLE CURRENT-CASE INSPECTION BASIS, REQUIREMENTS, CRITERIA, LOCATIONS, THRESHOLDS, AND SUPPORTING SOURCE/REVISION INFORMATION.
4. **REQ-06 IS TECHNICAL REVIEW/APPROVAL.** THE DESIGNATED **ENGINEERING** SUPERVISOR VERIFIES APPLICABILITY AND CURRENTNESS OF SELECTED TECHNICAL BASIS AND CRITERIA AND TECHNICALLY APPROVES THE TWD. THIS DOES NOT AUTHORIZE DOWNSTREAM JOB-ORDER, FUNDING, SCHEDULING, READINESS, OR WORK EXECUTION.
5. **TP-01 THROUGH TP-05 ARE LOGICAL OBSERVATION POINTS.** THEY DEFINE REQUIRED OBSERVABILITY AND EVIDENCE AND DO NOT, BY THEMSELVES, ESTABLISH ADDITIONAL SOFTWARE MODULES, SIGNATURES, OR APPROVAL AUTHORITIES.
6. **UNSATISFIED OR UNVERIFIED REQUIREMENTS BLOCK PROGRESSION.** DEFICIENCIES SHALL BE HELD, RESOLVED OR ESCALATED AS APPLICABLE, AND AFFECTED REQUIREMENTS/EVIDENCE REVALIDATED BEFORE RELEASE.
7. PROVENANCE AND TRACEABILITY SHALL BE MAINTAINED FOR CONTROLLED SOURCE INFORMATION, PRIOR-CASE MATERIAL, AI-DERIVED MATERIAL, HUMAN ENGINEERING DETERMINATIONS, AND WORKFLOW EVIDENCE.
8. THIS DRAWING DOES NOT SUPERSEDE THE CONTROLLED REQUIREMENTS BASELINE. THE APPROVED REQUIREMENTS AND SUPPORTING EVIDENCE DOCUMENTATION GOVERN IN THE EVENT OF CONFLICT.

Applies to the Node 1 to Node 2 process and TP-01 through TP-05 on Sheet 1.
